

# CMSA Alumni of The Month

Logan Medin '14

May 2022

## Pro-Tips from Logan

Highly recommended the book "Never Split the Difference" by Christopher Voss and Tahl Raz. A book on improving interpersonal communication.

"The more you learn with your eyes and hands in the field, the better."

## Project Manager

Logan Medin grew up in Lakeville, Minnesota, and graduated from Lakeville South High School. Medin took some engineering classes while in high school and was influenced by his family who were involved in the construction industry. After high school, he came to Minnesota State University, Mankato and started as a Civil Engineering major.

While at MSU, Medin switched majors to Construction Management, and really enjoyed learning from professor, Dr. Scott Fee who taught a scheduling class. Outside of the classroom, he volunteered his time as a CMSA committee member and interned at Braun Intertec Corporation. "What I really like about our CM program is that they really improved my interpersonal skills and made me think about the small things that add up in the end." he said.

After college, Medin received offers from both Mortenson Company and PCL Construction doing either wind farms or buildings. He thought he would enjoy constructing buildings more and so he joined PCL Construction as a Field Engineer out of Minneapolis. He says that getting field experience was a great way of moving his future career forward.

In 2019, Medin got an offer to become a Project Manager for PCL Construction out of their office in Los Angeles, California, where he has been for the last three years. Currently he is working at the LAX ConRAC project site, which will be the largest cast-in-place concrete project of its kind (only slightly smaller than the building area of the U.S. Pentagon). One of Medin's critical scopes on the project is the fueling system, which will be the world's largest vehicle gas station when it is completed. Throughout his professional career he has enjoyed working with a lot of different people and scopes.

Keep up the great work Logan, continue to set a great example for all current and former students!

Jason Nelson
