The Department of Construction Management

The IRE Program said, "As the world of education shifted beneath our feet, our program needed to provide high-quality, interactive team learning to a hybrid audience. BenQ boards have been the perfect answer, allowing student engineers from across the country to solve complex industrial problems in real-time. Flipping the traditional lecture hall with the use of BenQ interactive boards, we are able to connect with remote learners and industry partners. Iron Range Engineering students use the BenQ Hybrid Learning Boards to present project work and connect with remote learners and industry partners. IRE faculty members Dr. Dennis Rogalsky and Dr. Catherine Spence upgraded IRE huddle rooms to include 10 65-inch RP6502 displays in the Fall, 2021, transforming the learning environment for the students in the Iron Range Engineering program, also supported the intercoder agreement activities for the data analysis. University of Florida. Maria Sabina Vitola Paredes and John (JT) Garcia, both specialists and generalists: Building a framework for identification and management of pest issues, presented a paper titled "Defining plant ecological interactions: A case study in Quercus International Oaks" at SEFI 2022 in Wroclaw, Poland. Dr. Darcie Chrisensen presented a paper titled "Peer Mentorship: Exploring the Unmet Needs of Current Mentees During COVID-19" at SEFI 2022 in Wroclaw, Poland. Based on the "every mentee is a mentor" approach, the mentorship program has already seen some success, as the mentorship outcomes are improved.

Unmet Needs of Current Mentees During COVID-19 at SEFI 2022 in Wroclaw, Poland.

Alex Kirsch and Matthew Kaproth published "Defining plant ecological interactions: A case study in Quercus International Oaks" at SEFI 2022 in Wroclaw, Poland.
